cube round

A gentle statement

Wall-mounted, as a two-part composition in bright fuchsia, cube round brings dynamism to the entrance area. The rounded fronts take away the severity of the clear geometry and make room for a new, contemporary form of elegance that is functional, modern and surprisingly delicate.

 Soft
contours
with presence

cube round is a new design for side, low and highboards that turns clean lines and curved shapes into iconic furniture. Gently rounded corners characterize the design language and bring a soft touch to the clear design.

This creates a subtle visual softness without sacrificing clear elegance. Precisely crafted and thought through down to the last detail, cube round remains flexible in its design and open to different room and style worlds.

cube
round

Reserved presence

Calm and stylish in muted tones. The flowing lines, precise joints and soft radii create an atmosphere of unagitated modernity. A lowboard that blends in harmoniously - and yet holds the eye with every detail.

Where
shape
meets clarity

In the home office, cube round proves how beautiful storage space can be. Practically conceived, emotionally designed - for a working environment with style and soul.

A duo in balance

Two cube round chests of drawers, finely coordinated in different shades of green, form a harmonious ensemble. On elegant, slender legs, they appear light and yet confident - with clear lines and soft contours.
