The concept

A clear language of forms, finely finished details, innovative materials and modern Colors: mell is a collection of expressive charismatic solo pieces with a strong character that nevertheless do not dominate. mell individually develops its charm and emotionality in every living space and architectural environment, and embodies urbane modernity with its innovative designs.

In mell, interlübke has combined its unique and inimitable lacquered surfaces with the finest materials from the natural and technological worlds. High-quality woods and genuine stones are contributed by nature; different Colors, surfaces and structures

create elegant tone in tone compositions with matt lacquer cabinets or accentuate fine highlights.

With its unobtrusive use of materials, the mell collection includes individually usable sideboards, an elegant and stylish escriptorio, floating wall elements for vertical or horizontal room structures and bed models designed to match that are wrapped in high-quality fabrics and leather coverings.

Design: Jehs+Laub

By colors and materials

Colors for body and front

- matt lacquer
- high-gloss lacquer

Handle strips

Several drawers arranged side by side have one type of handle strip.

Several hinged doors arranged side by side have one type of handle strip.

Gliding doors have one type of handle strip.

O83 chrome grip profiles are standard.

The handle strips can also be ordered in all matt lacquers such as O86 stainless steel coloured and O82 burnished, without surcharge, in the background colour or as a colour accent.

Stand and frame types

Floor-based (as standard) with little leg elements, 2.5 cm high for hinged doors and drawers, 3.5 cm high for gliding doors.

Wall-mounted Wall distance 0.7 cm.

Staggered skid frame for widths 180.0 / 210.0 / 240.0 / 300.0 cm, skid height 13.3 cm

Flush skid frame for widths 60.0 / 90.0 / 120.0 cm, skid height 13.3 or 20.8 cm

A sideboard's total height is calculated as follows: sideboard height + leg element (2.5 cm or 3.5 cm for gliding doors) or sideboard height + skid frame (13.3 cm or 20.8 cm).

Hinged doors, drawers and flaps

Hinged doors with full-length handle.

One or more drawers from the top row can be replaced by a flap.

Gliding doors

Gliding doors are installed flush to the surface in a closed position.

An optional model, fitted with two drawers, can be added as an expansion. This addition can be installed retroactively.

The gliding doors are 3.7 cm apart when opened.

Access to the upper compartment is reduced by 6.6 cm as a consequence of the gliding doors' path of travel.

Sideboards with gliding doors must be secured to the wall and may not be implemented as room dividers.

Drawers
Interior fittings of solid oak

Organisational compartment
Including cable inlet (standard), optionally with a power box, including textile cable and installable with 2 oak boxes

Including textile cable in black-white (standard) or red-orange
