Wardrobe

Design: interlübke

Collection description

Planning stages	4
Interior compartments	6
Handles	8
Lighting	9

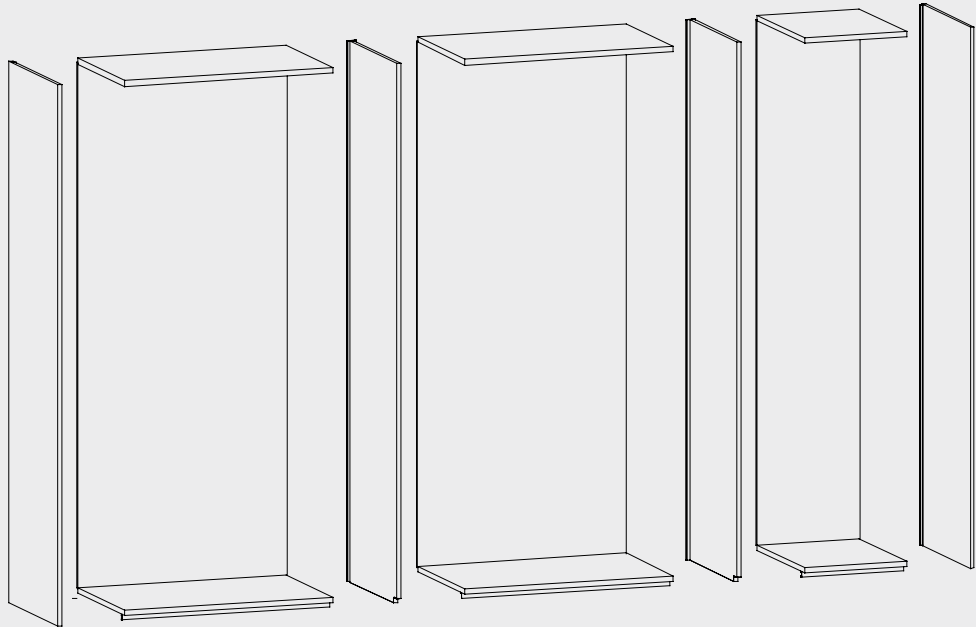

The concept

Pure on the outside, a classic shape, and all in the usual interlück quality and endless design in three heights, two widths and one depth, intaro provides the perfect storage solution for your home. Whether in a pure snow-white of the basic features or any of 30 Colours and with the additional of three handle variants, your individually designed wardrobe will appeal for the clear looks of both the outside and the inside, and with a flexible interior in snow-white or silver-grey metallic.

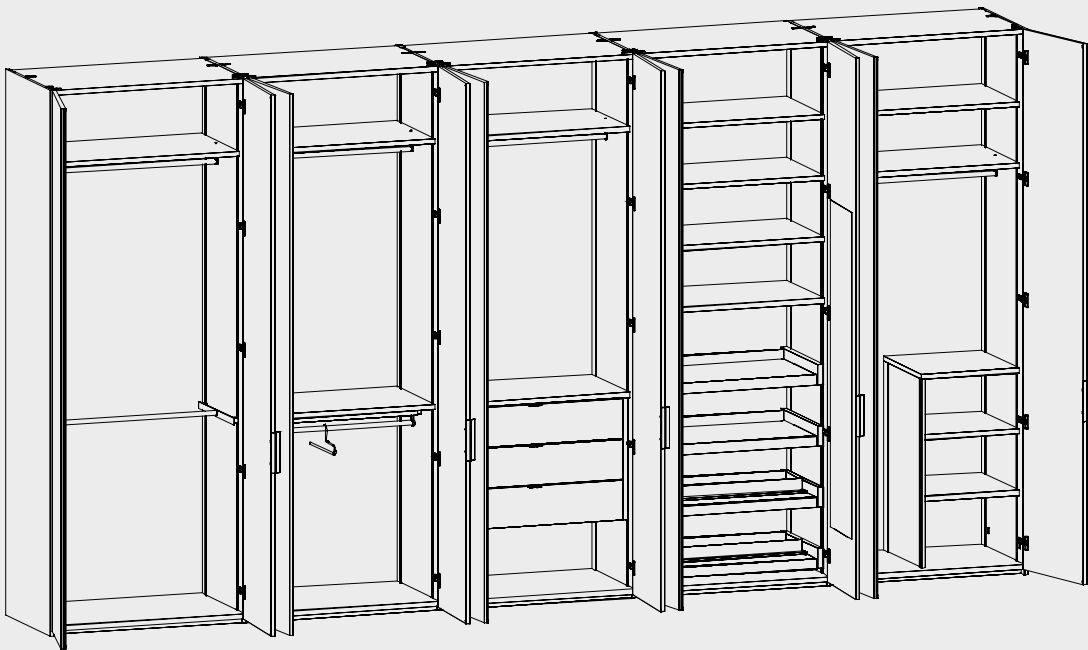

Planning stages

1. Wardrobe – elements

- Start on the left with the outside.
- Then follow with a 48.0 or 98.0 cm wide wardrobe unit, a middle side and alternately again a wardrobe unit and a middle side. Continue until the desired wardrobe width is reached.
- The end is formed by a right-hand outer side.

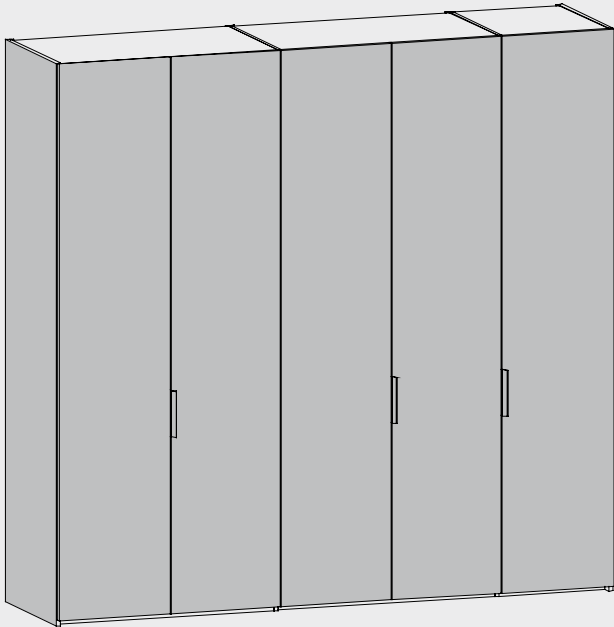

2. Interior compartments

- Complete the wardrobe units with shelves, clothes rails, internal drawers, pull-out shelves, shoe racks or pull-out clothes rails.
- An interior mirror is available for the inside of the door.

Planning stages

3. Fronts, coloured exteriors and handles

- Plan single doors for 48.0 cm wide wardrobe units and specify the door hinge on the left or right. Double doors are used for 98.0 cm wide wardrobe units.
- Please specify: • Front colour for all doors • Exterior painted in front colour (surcharge)
- Select one of the three handle variants and the handle colour. Specify at the dot handle and at the handle bar: • Double doors with a handle on the right door • Double doors left and right with handle
- The recessed base forms a shadow gap and is always anthracite.

Interior compartments

All interior compartments are fixed in the perforated rails which are let into the inside of the wardrobe sides. The adjustment distance is 2.5 cm for optimum use of storage space. When planning the interior compartments, no consideration must be given to possible hinge positions of the hinge-doors. Hinge positions of the hinged doors. The easily adjustable shelf supports are recessed flush with the shelves.

Shelves with hanging rail
The stainless steel coloured clothes rail is mounted with a fine graphic holder below the shelves.
Can be loaded with a maximum of 36 kg.

Hanging rail for fixing to sides
The stainless steel-coloured clothes rail is fixed in the perforated rails and can therefore be adjusted in height or retrofitted at any time without leaving any drill holes.
Can be loaded with a maximum of 36 kg.

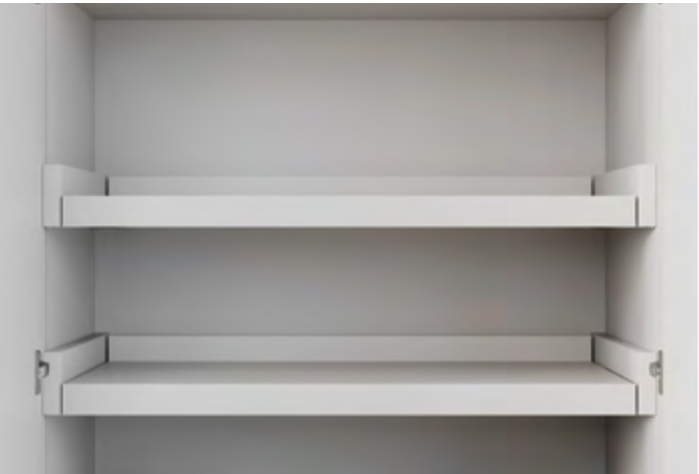

Extendable hanging rail
The pull-out clothes rail, which is offset to the front, allows for easy access and optimum view of trousers and co.
Maximum load capacity 17 kg.

Interior compartments

Interior drawers
are fixed in the perforated rails by recessed spacer sides and can therefore be adjusted in height and added to without leaving any visible drill holes in the sides. An additional shelf can be ordered as a top cover.
interlück exclusive are the graphic internal drawers with only 0.4 cm thick aluminium sides in the warm colour cashmere grey. The underfloor full-extension runners are equipped with the latest technology and damped self-closing runners.

Pull-out shelves
for laundry and shoes allow convenient access to items lying at the back. The rear upstand prevents things from falling down.

Shoe racks
for shelves and pull-out shelves can be moved flexibly. Two shoe racks are recommended for shoe lengths up to 26.0 cm, one shoe rack for longer lengths.

Carcase
High-quality lacquered interior surfaces, invisible rear wall fixings and 1-piece rear walls ensure a clear and 1-piece rear panels even on double-door wardrobe units. No visible technical details distract from the purist look.

intaro can cope with many moves, because thanks to the unique, invisible interlück back panel profiles and the stable 0.8 cm thick back panels, the wardrobes are always easy to dismantle and reassemble.

Handles

Not only a delight to the touch, but also a fundamental design feature: the handles for your wardrobe. Choose from three different shapes, available either tone-in-tone with the colour of the front for a subtle light and shadow play, or as a highlight in an accent colour.

dot handle design by
Hanne Willmann

dot handle
on the right door as standard with double doors.
Available on both sides for a surcharge.
Height top edge of handle: 102,2 cm
Diameter: 6.0 cm
Depth: 2.0 cm

Profile handle (surcharge)
on the right door as standard with double doors.
Available on both sides for a surcharge.
Height top edge of handle: 102,2 cm
Length: 99.7 cm
Depth: 1.8 cm

Handle strip
integrated in the front edge.
Always on the right door with double doors.
Height top edge of handle: 102,2 cm
Length: 20.0 cm
Depth: 2.7 cm

Wardrobe lighting

The wardrobe lighting with warm white light is integrated into the wardrobe sides behind the front perforated rail. Due to the slight inclination, the rear wardrobe area is also illuminated.

The interior fittings fixed in the perforated rails can be adjusted in height at any time. They are always switched on via the door opening on the right-hand door in the case of double doors. The sets for the power supply are accommodated in the plinth.

For units without a hinged door for walk-in wardrobes, the switching is done by a switchable socket or a radio switching set that can be ordered optionally.
