

tavi
Sideboard System

Cheekily set up

interlübke

Versatile by principle

The tavi sideboard programme plays with its possibilities. The open elements are positioned at the top, front or side - hence the name tavi, which comes from the Slavic word for "set up". Presentation surfaces alternate with closed fronts and tempt you to play with the levels.

The large selection of modules with combinations of hinged doors, drawers and flaps allows many very individualised low-board, sideboard, solitary or high-board configurations and brings movement into the furnishing concept - tavi can go from very small to large.

tavi
concept

Skilfully opened is well accentuated
- tavi shows this in simple elegance.
The attached or detached shelves
and open elements can also come in
different surface designs.

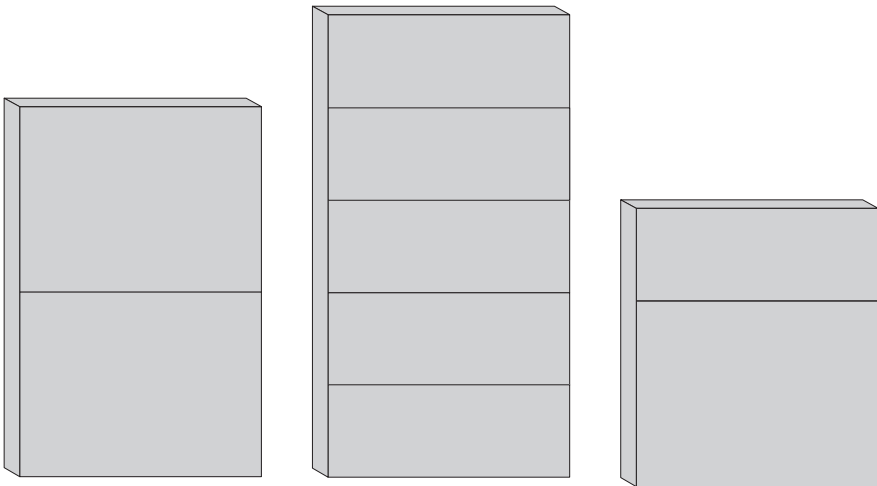

Tops

Open modules, trays and cover
panels.

Modules

up to 6 grids in various combinations
of hinged doors, drawers and flaps.

Open modules

under the cover panel or flush with
the cover panel.

1x USB-C and USB-A combination

materials

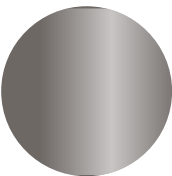

matt lacquer metallic, stone, wood

nterlübke colours and materials harmonise perfectly with each other within their colour concepts. The colours are compatible in their degree of saturation and colour scheme and complement and emphasise each other. Their shades are characterised by subtle nuances and soft accents.
